Stanislav Zvánovec	CTU	xzvanove@fel.cvut.cz

Executive Summary

In this report, the structure, content and appearance of the project website is reported.

1. Project website

A new domain <https://owin6g.eu/> was bought in April 2023 (valid for 10 years) and servers were prepared for hosting the project website. The project web site was created by Thomas Kamalakis in WordPress (version 6.2) in April 2023 and optimized since the start of OWIN6G project. It is divided in Short introduction (“Home”), “Project” pages, “News and events” part, “Partners” description and the main part “People” including a description of Doctoral candidates and supervisors.

Web pages will be updated by the project manager and selected doctoral candidate (voted by students on a particular period).

Special pages were also dedicated to the project on popular research sites such as ResearchGate. The same is being done on LinkedIn, Facebook, and Twitter.

In parallel to the website, a joint email conference: owin6g@fel.cvut.cz was created, where all supervisors are included and latter on, doctoral candidates will be added as well when they join the project
